ATTACHMENT: Table 1.docx

Hi, Dan,

Resampling is being planned at the Olin site for late February or early March. Less than five private well samples will be collected.

I believe your laboratory will be tasked with performing the same analyses that you did last time (see table 1 - all but NDMA).

Also, several additional analytes have been identified to be included in this next round (see Olin Propose Add'l Drinking Well Analytes attached).

Are any of these analytes able to be completed by your laboratory during this sampling event?

I believe Jim DiLorenzo will be asking you this too. If your laboratory is not able to do some of these tests, I may need to consider DAS options and any leads you may have on laboratory sources would be appreciated as many of these are specialty tests.

Let us know.

Thank you for your assistance,

Gail
